

## About Us

Elevate Impact is a **web-based platform + consulting hybrid** solution that **connects clinicians, researchers, patient advocacy and clinical trial recruitment groups** to facilitate shared insights, collaboration, and discovery for rare and chronic diseases.

## Initial Focus Area

Elevate Impact's first target area is Sickle Cell Disease (SCD)—a highly prevalent rare disease that remains significantly underfunded, lacks public awareness, and has limited clinical trial activity. By starting with SCD, we intend to demonstrate how cross-sector collaboration can accelerate progress and create scalable models for broader healthcare challenges.

## Our Platform Solution: How it Works

### Verified Users

All users are verified through their organization's email to confirm role and organization.

### Automated Introductions

Facilitated connections between users with shared interests or complementary needs.

### Focused Conversation Threads

Topic-based conversations with specific tags to organize discussion threads.

### Featured Stories

Projects and collaborations made possible through Elevate Impact are spotlighted to inspire.

## Key Consulting Services

When platform discussions surface deeper strategic needs, we offer consulting as an add-on service with expert-led support ranging from **advisory engagements, learning content design, workshop facilitation**, and clinical trial **project management**.

## Consulting Engagement Topics

- Partnership, stakeholder engagement and resource mobilization
- Program planning and implementation, including clinical trial engagement
- Designing innovative communication strategies and toolkits to elevate reach, impact, and engagement.
